

Tackling N-Loss Targets

Let's Keep the Momentum Going

Monday 8 December 2025

10:45am – 1:00pm (tea/coffee from 10:30am. Lunch 1.00pm)

Pencarrow Farm, 88 Rundles Road, Ashburton

Hosted by Andy and Trish Macfarlane

Join forward-thinking farmers and scientists for a high-impact session focused on ground and surface water quality trends, the future of nitrogen management and actions to meet water quality regulations.

Why attend?

- **Hear from Fonterra Board Member Andy Macfarlane** on how strategic implementation of plantain and other mitigation tools are driving N-loss reductions while delivering on-farm performance.
- **Engage in a Q&A with local farmers** who are leading the way in adapting to environmental regulations.
- **Gain insights into the latest DairyNZ-led research**, including:
 - * *Plantain Potency and Practice*
 - * *Low N Systems*

This is a unique opportunity to connect with other farmers, explore practical solutions, and shape your business's response to evolving water quality expectations.

Let's keep the momentum going - your leadership matters.
